

#### More power for your vehicle

Up to 25% more power for your vehicle with a BoostPro tuning. More power, more driving pleasure and lower fuel consumption - simply ingenious.

#### Latest tuning software

The BoostPro tuning software is precisely customized to each specific vehicle engine. Optimal results and a high degree of safety for your driving pleasure.

#### 6 performance profiles

Select your individual BoostPro tuning from 6 performance profiles at the touch of a button. The extra power can be adjusted or switched off at any time and according to your needs.

#### Simple plug-in installation

The new BoostPro can be quickly and easily connected to the engine electronics. Immediately after installation the BoostPro is ready for use.

#### Engine protection and safety

BoostPro tuning uses the power reserves of the engine while all engine protection functions remain. A non-residue retrofitting is possible at any time.

#### A new tuning generation

## The performance plus for your vehicle

// Experience your car  
completely new //

A new tuning generation

## Maximum power for maximum driving performance

The new BoostPro provides a significant plus in power in a completely new tuning system. More power, more torque and the best acceleration for your vehicle. The centrepiece of the new BoostPro is the integrated keypad: for an optimal driving experience, the compact performance package can be fully customized at any time.

# BOOSTR<sup>®</sup> PRO

▶ More power ▶ Easy installation ▶ Safe and reliable

// **BoostPro with modern and innovative tuning technology for an impressive and immediate increase in power.** //

### Performance perfected

For an unique driving experience, the BoostPro tuning can be easily adjusted at the push of a button. A total of 6 performance profiles are available for individual adaptation of the engine.

### Intelligent tuning software

The BoostPro tuning software is vehicle specific measured with the latest test bench technology and extensive road tests. The tuning result inspires every day anew.

### Perfect from every angle

The powerful BoostPro tuning box is connected directly to the engine management sensors in just a few steps in the engine compartment. The result is an impressive performance improvement for all current turbo gasoline, hybrid and diesel engines.

A noticeable performance increase through the entire rev range which ensures an extraordinary power development and an unbeatable driving pleasure. Take advantage of a BoostPro tuning for your car.
